I am a self-taught web developer with an eagerness to learn and grow. I'm currently an administrative assistant in the construction field and hold a Chinese teaching certification from my bachelor's program, however after several years I realized I wanted to make a change and in 2020 while between jobs I dedicated 8+ hours a day from July 2020 to March 2021 to teaching myself new skills that can be of value in the software industry. Though I am currently working now, I continue to invest my free time to further my studies in programming and computer science. I am looking forward to finding a full-time or part-time position where I can offer my existing skills and talents to help my future employer, while also having the opportunity to learn and grow new skills along the way.

Experience

Allied Stone Inc., Jersey Village, Texas, USA
